# **Energy Efficiency and Electric Infrastructure in the State of Indiana**

The simple choice for energy efficiency.

In any given state, there are a range of stakeholders well-positioned to contribute to the design and delivery of effective energy efficiency programming. This factsheet provides an overview of relevant entities in the state of Indiana, along with highlights of state policies and practices related to energy efficiency. The entity types described and highlighted below are typically involved in electricity and/or energy efficiency related matters in states. Other important stakeholders such as trade associations, industry, and local businesses are not included as they vary significantly from state to state.

\* \* \*

#### **Electric Market Overview**

#### **Electric Utilities**

Privately- and publicly-owned electric utilities generate, transmit, distribute, and/or sell electricity primarily for use by the public. These include investor-owned electric utilities, municipal and state utilities, Federal electric utilities, and rural electric cooperatives. The following summarizes electric utilities in Indiana by type:

Investor-Owned Electric Utilities:

Duke Energy Indiana Inc.: <a href="https://www.duke-energy.com/indiana.asp">https://www.duke-energy.com/indiana.asp</a>
Indiana Michigan Power Company: <a href="https://www.indianamichiganpower.com/">https://www.indianamichiganpower.com/</a>
Indianapolis Power & Light Company: <a href="https://www.nipsco.com/">https://www.nipsco.com/</a>
Northern Indiana Public Service Company: <a href="https://www.nipsco.com/">http://www.nipsco.com/</a>
Southern Indiana Gas & Electric Company d/b/a Vectren Energy Delivery of Indiana, Inc.: <a href="https://www.vectren.com/">https://www.vectren.com/</a>

- Member-Owned (Electric Cooperative): Indiana has 37 distribution electric cooperatives
- Municipally-Owned/Publicly-Owned Utilities: Indiana has 21 municipally- or publicly-owned electric systems in the state
- Other: 1 Municipal Marketing Authority; 1 Wholesale Power Marketer<sup>2</sup>

Electric utility service areas (as available): <a href="http://maps.indiana.edu/previewMaps/Infrastructure/Energy\_Electric\_Service\_Territories.html">http://maps.indiana.edu/previewMaps/Infrastructure/Energy\_Electric\_Service\_Territories.html</a>

#### Status of Electric Industry Restructuring

Vertically integrated utilities are responsible for generation, transmission and distribution of power to customers. In the 1990's, many states began to unbundle the electricity supply and distribution functions of investor-owned utilities on the theory that only the wires (the fixed network system) constituted a natural monopoly, while the generation of power did not. In states that have undergone restructuring, individual retail customers can choose their supplier but still receive delivery over the power lines of the local utility.<sup>3</sup>

Indiana does not have a restructured electric industry, http://www.eia.gov/electricity/policies/restructuring/indiana.html

<sup>&</sup>lt;sup>2</sup> Sources: EIA 2013 Form EIA-861 Utility Data (<a href="http://www.eia.gov/electricity/data/eia861/">http://www.eia.gov/electricity/data/eia861/</a>) and Indiana Utility Regulatory Commission (<a href="http://www.in.gov/iurc/files/Electric">http://www.in.gov/iurc/files/Electric</a> Regulated Utilities 7-8-13.pdf)

# Regional Transmission Organization (RTO)/Independent System Operator(ISO)

About 60% of U.S. electric power supply is managed by RTOs or ISOs: independent, membership-based organizations that ensure reliability and usually manage the regional electric supply market for wholesale electric power. In the rest of the country, electricity systems are operated by individual utilities or utility holding companies. RTOs/ISOs engage in long-term planning that involves identifying effective, cost-efficient ways to ensure grid reliability and system-wide benefits. Coordination and cooperation between utilities, state PUCs and RTOs/ISOs is often required to advance energy efficiency goals.<sup>4</sup>

Most of Indiana is part of the Midcontinent Independent System Operator (MISO): <a href="https://www.misoenergy.org">https://www.misoenergy.org</a>, while the northeastern part of the state is part of PJM: <a href="https://www.pjm.com/">https://www.pjm.com/</a>

# **Utility Oversight and Planning**

## **Utility Oversight**

Public Utility Commissions (PUCs) oversee goals, investments, and ratemaking for investor-owned electric utilities. Most of this oversight is conducted via specific regulatory proceedings. Municipally-owned utilities are governed by a local city council or an elected commission, and member-owned/cooperative utilities are governed by a board elected by members. In a few states, PUCs have oversight over some aspects of municipally and member-owned utility performance such as energy efficiency resource standards.<sup>5</sup>

 The Indiana Utility Regulatory Commission (IURC) regulates electric, natural gas, telecommunications, steam, water and sewer utilities. These utilities may be investor-owned, municipal, not-for-profit or cooperative utilities or they might operate as water conservancy districts. <a href="http://www.in.gov/iurc/">http://www.in.gov/iurc/</a>

#### Integrated Resource/Procurement Planning

Integrated resource plans (IRPs) are utility plans for meeting forecasted annual peak and energy demand through a portfolio of supply-side and demand-side resources over a specified future period. As of early 2015, integrated resource planning is required or present in more than 30 states, including most vertically integrated/non restructured states. In states that are restructured, regulated distribution-only utilities may be required to develop procurement plans to service customers that do not choose a competitive retail supplier. Energy efficiency is considered as a demand-side resource but the degree to which it is included in resource/procurement planning is influenced by other factors including policies such as energy efficiency resource standards or requirements that all cost effective energy efficiency be considered.<sup>6</sup>

- Indiana is currently undertaking a planning process to revise their rules for integrated resource planning, which it expects to have finalized in early 2016. <a href="http://www.in.gov/iurc/2842.htm">http://www.in.gov/iurc/2842.htm</a>

## **Statewide Planning Process**

States sometimes undertake executive or legislatively driven statewide energy planning processes. These plans may be completely independent of utilities or may explicitly engage utilities.

#### **Energy Efficiency Potential Studies**

Energy efficiency potential studies determine the amount of technical, economic, and achievable potential for energy efficiency in a region, state, or utility service territory. Energy efficiency potential studies may be undertaken by state agencies or energy efficiency advocacy organizations, or by utilities as part of or to inform compliance with a regulatory requirement. The following are recent energy efficiency potential studies:

- Energy Efficiency Market Potential Study and Action Plan, 2012 EnerNOC, Inc.: <a href="https://www.vectren.com/assets/cms/livesmart/pdfs/Tech%20Appendix%20D%20-%20Vol-1%20Vectren%20MPSAP%20Exec-Summary.pdf">https://www.vectren.com/assets/cms/livesmart/pdfs/Tech%20Appendix%20D%20-%20Vol-1%20Vectren%20MPSAP%20Exec-Summary.pdf</a>
- NIPSCO DSM Potential Study, 2014, Applied Energy Group: <a href="https://myweb.in.gov/IURC/eds/Modules/Ecms/Cases/Docketed\_Cases/ViewDocument.aspx?DocID=0900b631801c78a6">https://myweb.in.gov/IURC/eds/Modules/Ecms/Cases/Docketed\_Cases/ViewDocument.aspx?DocID=0900b631801c78a6</a>

# **Energy Efficiency Policies/Activities**

# Statewide Clean Energy Policy/Energy Efficiency Energy Resource Standard(s)

Energy efficiency resource standards (EERSs) require obligated parties—usually regulated retail distributors of electricity—to meet a specific portion of their electricity demand through energy efficiency. As of March 2015, 27 states have some type of energy efficiency requirement or goal.<sup>7</sup>

• Indiana does not have a mandatory energy efficiency resource standard. Indiana's previous standard, which had been adopted by regulatory order in 2009, was overturned by legislation in 2014.

## **Current Utility-Administered Energy Efficiency Programs**

Energy efficiency is regarded as an important utility resource with co-benefits that include reducing air pollution, saving customers on utility bills, and creating local jobs. While the majority of large-scale energy efficiency programs are funded by utility ratepayers, program administration may be by the utility, the state, an independently awarded program administrator or a combination of entities. Below are available links related to ratepayer-funded energy efficiency programs offered in the state<sup>8</sup>:

- Program Administrator: Duke Energy Indiana Inc.: <a href="http://www.duke-energy.com/indiana/savings.asp">http://www.duke-energy.com/indiana/savings.asp</a> and <a href="http://www.duke-energy.com/indiana/savings.asp">http://www.duke-energy.
- Program Administrator: Indiana Michigan Power Company: http://www.electricideas.com/

 ENERGY STAR Partner since 2002

# **Other Key Stakeholders**

#### State Air Office:

Indiana Department of Environmental Management: <a href="http://www.in.gov/idem/">http://www.in.gov/idem/</a>

# **State Energy Office:**

Indiana Office of Energy Development: <a href="http://www.in.gov/oed/">http://www.in.gov/oed/</a>

# Consumer Advocate(s)

Most states also have one or more consumer advocacy organizations. Consumer Advocates are often concerned with maintaining low rates and ensuring equitable treatment of all customer classes.<sup>9</sup>

Indiana Office of Utility Consumer Counselor: <a href="http://www.in.gov/oucc/2364.htm">http://www.in.gov/oucc/2364.htm</a>

#### Others Public Interest Groups

Groups representing environmental and other public interests are often involved in providing public input or technical expertise during regulatory proceedings or stakeholder processes. The following energy efficiency organizations/nonprofits are active in the state or region:

- Midwest Energy Efficiency Alliance (MEEA): http://www.mwalliance.org/
- Citizens Action Coalition of Indiana (CAC): <a href="http://www.citact.org">http://www.citact.org</a>

ENERGY STAR is the simple choice for energy efficiency. For more than 20 years, EPA's ENERGY STAR program has been America's resource for saving energy and protecting the environment. Join the millions making a difference at <a href="mailto:energystar.gov">energystar.gov</a>

\* Revised January 19, 2016. To alert the U.S. EPA of substantial policy changes or program updates, please contact eeaccountmanager@icfi.com
